

## 1. Description

### 1.1. Project

|                 |                   |
|-----------------|-------------------|
| Project Name    | F722ZE_USART_CDC  |
| Board Name      | NUCLEO-F722ZE     |
| Generated with: | STM32CubeMX 6.2.1 |
| Date            | 08/29/2021        |

### 1.2. MCU

|                |               |
|----------------|---------------|
| MCU Series     | STM32F7       |
| MCU Line       | STM32F7x2     |
| MCU name       | STM32F722ZETx |
| MCU Package    | LQFP144       |
| MCU Pin number | 144           |

### 1.3. Core(s) information

|         |               |
|---------|---------------|
| Core(s) | Arm Cortex-M7 |
|---------|---------------|

### 3. Pins Configuration

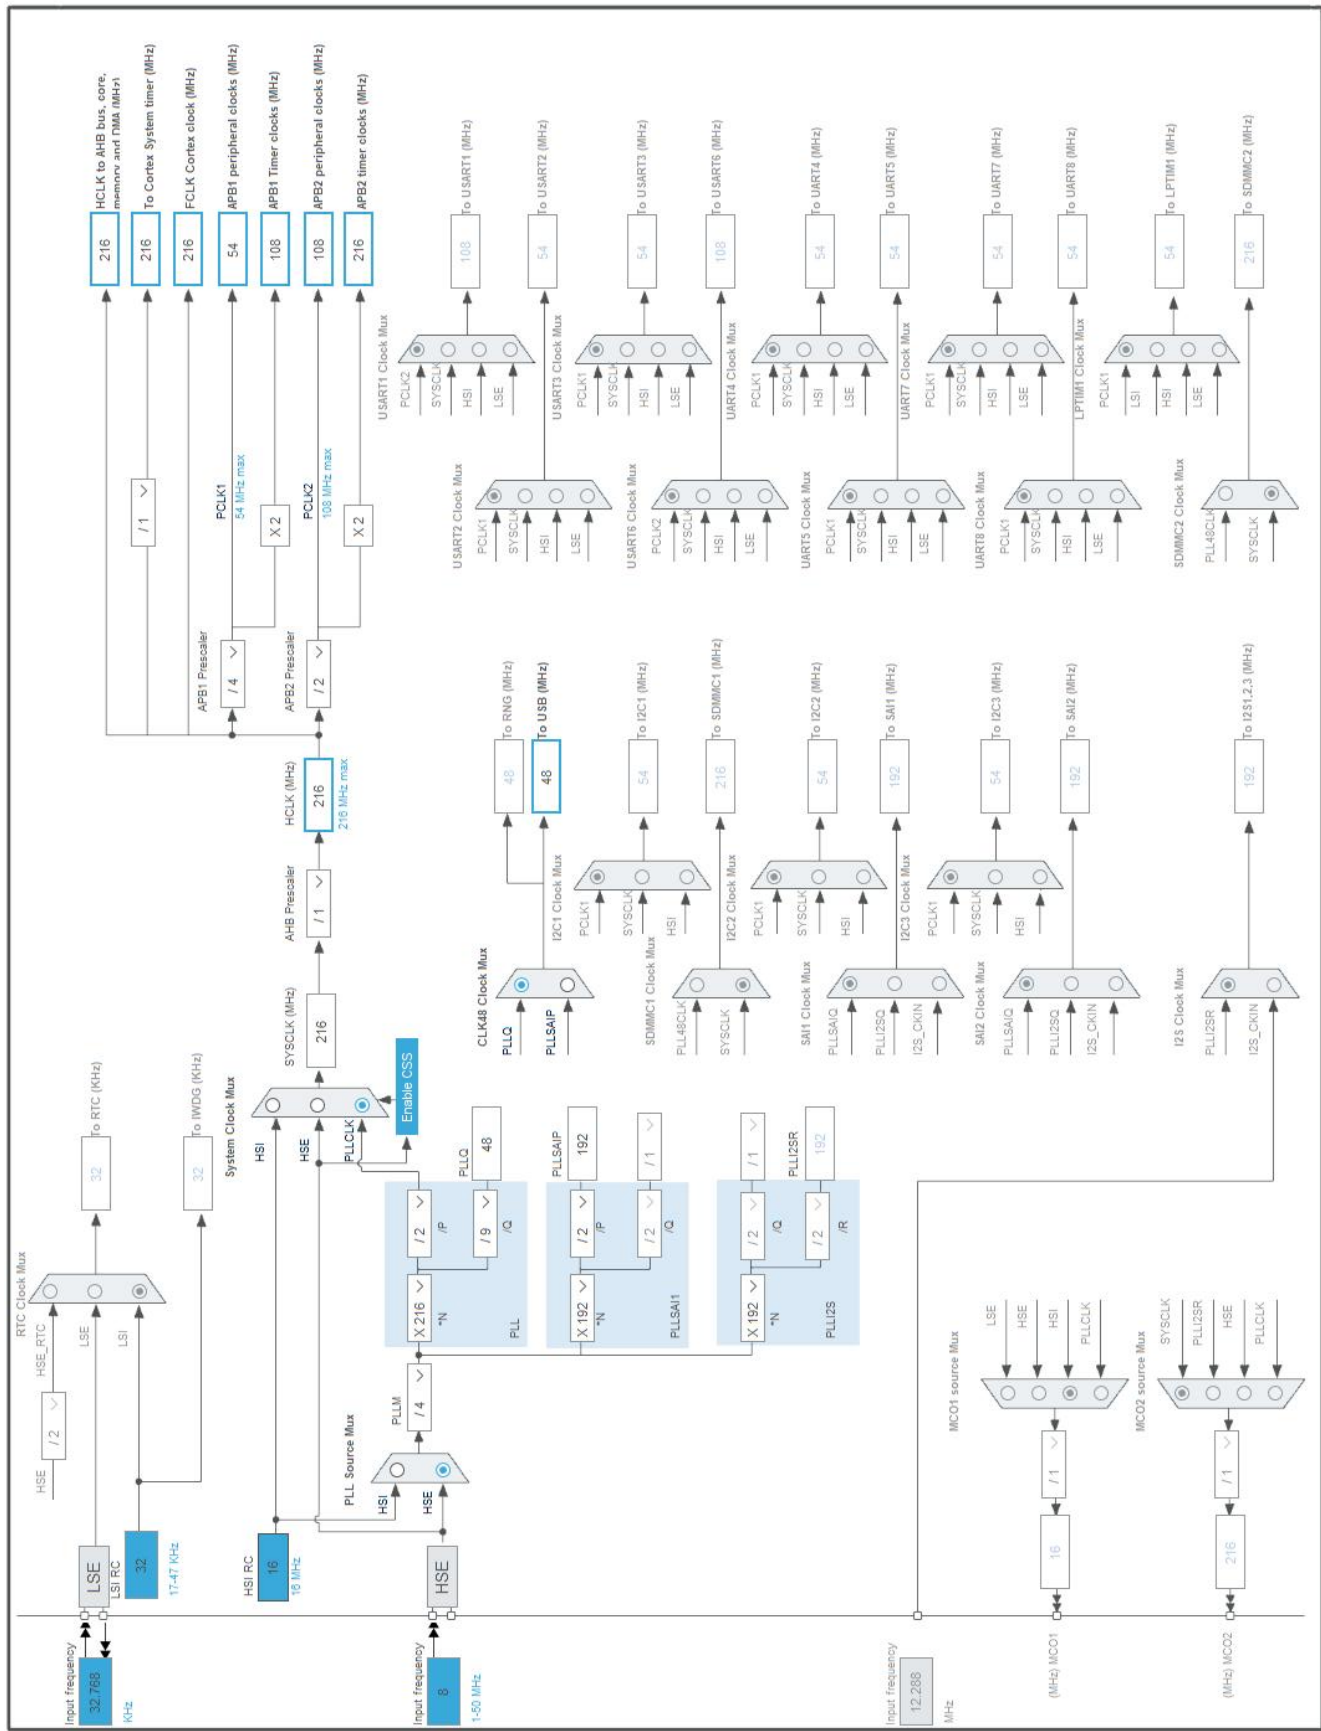

| Pin Number<br>LQFP144 | Pin Name<br>(function after<br>reset) | Pin Type | Alternate<br>Function(s) | Label                                  |
|-----------------------|---------------------------------------|----------|--------------------------|--|
| 6                     | VBAT                                  | Power    |                          |  |
| 7                     | PC13                                  | I/O      | GPIO_EXTI13              | USER_Btn [B1]                          |
| 8                     | PC14-OSC32_IN                         | I/O      | RCC_OSC32_IN             |  |
| 9                     | PC15-OSC32_OUT                        | I/O      | RCC_OSC32_OUT            |  |
| 16                    | VSS                                   | Power    |                          |  |
| 17                    | VDD                                   | Power    |                          |  |
| 23                    | PH0-OSC_IN                            | I/O      | RCC_OSC_IN               | MCO                                    |
| 24                    | PH1-OSC_OUT                           | I/O      | RCC_OSC_OUT              |  |
| 25                    | NRST                                  | Reset    |                          |  |
| 30                    | VDD                                   | Power    |                          |  |
| 31                    | VSSA                                  | Power    |                          |  |
| 32                    | VREF+                                 | Power    |                          |  |
| 33                    | VDDA                                  | Power    |                          |  |
| 38                    | VSS                                   | Power    |                          |  |
| 39                    | VDD                                   | Power    |                          |  |
| 46                    | PB0 *                                 | I/O      | GPIO_Output              | LD1 [Green]                            |
| 51                    | VSS                                   | Power    |                          |  |
| 52                    | VDD                                   | Power    |                          |  |
| 61                    | VSS                                   | Power    |                          |  |
| 62                    | VDD                                   | Power    |                          |  |
| 71                    | VCAP_1                                | Power    |                          |  |
| 72                    | VDD                                   | Power    |                          |  |

| 131                   | VDD                                   | Power    |                          |            |
| 133                   | PB3 **                                | I/O      | SYS_JTDO-SWO             | SWO        |
| 137                   | PB7 *                                 | I/O      | GPIO_Output              | LD2 [Blue] |
| 138                   | BOOT0                                 | Boot     |                          |            |
| 143                   | PDR_ON                                | Reset    |                          |            |
| 144                   | VDD                                   | Power    |                          |            |

\* The pin is affected with an I/O function

\*\* The pin is affected with a peripheral function but no peripheral mode is activated

## 4. Clock Tree Configuration

## 5. Software Project

### 5.1. Project Settings

| Name                              | Value   |
|-----------------------------------|---|
| Project Name                      | F722ZE_USART_CDC  |
| Project Folder                    | F:\writing\F722ZE_USART\F722ZE_USART_Example\F722ZE_USART_CDC |
| Toolchain / IDE                   | STM32CubeIDE  |
| Firmware Package Name and Version | STM32Cube FW_F7 V1.16.1                                       |
| Application Structure             | Advanced  |
| Generate Under Root               | Yes   |
| Do not generate the main()        | No  |
| Minimum Heap Size                 | 0x200   |
| Minimum Stack Size                | 0x400   |

### 5.2. Code Generation Settings

| Name  | Value                                 |
|---|---------------------------------------|
| STM32Cube MCU packages and embedded software                    | Copy only the necessary library files |
| Generate peripheral initialization as a pair of '.c/.h' files   | Yes                                   |
| Backup previously generated files when re-generating            | No                                    |
| Keep User Code when re-generating                               | Yes                                   |
| Delete previously generated files when not re-generated         | Yes                                   |
| Set all free pins as analog (to optimize the power consumption) | No                                    |
| Enable Full Assert  | No                                    |

### 5.3. Advanced Settings - Generated Function Calls

| Rank | Function Name      | Peripheral Instance Name |
|------|--------------------|--------------------------|
| 1    | MX_GPIO_Init       | GPIO                     |
| 2    | SystemClock_Config | RCC                      |
| 3    | MX_USB_DEVICE_Init | USB_DEVICE               |

## 6. Power Consumption Calculator report

### 6.1. Microcontroller Selection

|           |               |
|-----------|---------------|
| Series    | STM32F7       |
| Line      | STM32F7x2     |
| MCU       | STM32F722ZETx |
| Datasheet | DS11853_Rev3  |

### 6.2. Parameter Selection

|             |     |
|-------------|-----|
| Temperature | 25  |
| Vdd         | 3.3 |

### 6.3. Battery Selection

|                   |              |
|-------------------|--------------|
| Battery           | Alkaline(9V) |
| Capacity          | 625.0 mAh    |
| Self Discharge    | 0.3 %/month  |
| Nominal Voltage   | 9.0 V        |
| Max Cont Current  | 200.0 mA     |
| Max Pulse Current | 0.0 mA       |
| Cells in series   | 1            |
| Cells in parallel | 1            |

## 6.4. Sequence

|                               |                |                           |
|-------------------------------|----------------|---------------------------|
| <b>Step</b>                   | Step1          | Step2                     |
| <b>Mode</b>                   | RUN            | STOP UDM (Under Drive)    |
| <b>Vdd</b>                    | 3.3            | 3.3                       |
| <b>Voltage Source</b>         | Battery        | Battery                   |
| <b>Range</b>                  | Scale1-High    | No Scale                  |
| <b>Fetch Type</b>             | ITCM RAM REGON | n/a                       |
| <b>CPU Frequency</b>          | 216 MHz        | 0 Hz                      |
| <b>Clock Configuration</b>    | HSE PLL        | Regulator LP Flash-PwrDwn |
| <b>Clock Source Frequency</b> | 4 MHz          | 0 Hz                      |
| <b>Peripherals</b>            |                |                           |
| <b>Additional Cons.</b>       | 0 mA           | 0 mA                      |
| <b>Average Current</b>        | 99 mA          | 100 $\mu$ A               |
| <b>Duration</b>               | 0.1 ms         | 0.9 ms                    |
| <b>DMIPS</b>                  | 462.0          | 0.0                       |
| <b>Ta Max</b>                 | 100.75         | 105                       |
| <b>Category</b>               | In DS Table    | In DS Table               |

## 6.5. Results

|               |                  |                 |                 |
|---------------|------------------|-----------------|-----------------|
| Sequence Time | 1 ms             | Average Current | 9.99 mA         |
| Battery Life  | 2 days, 14 hours | Average DMIPS   | 462.24005 DMIPS |

## 6.6. Chart

## 7. *Peripherals and Middlewares Configuration*

### 7.1. RCC

**High Speed Clock (HSE): BYPASS Clock Source**

**Low Speed Clock (LSE) : Crystal/Ceramic Resonator**

#### 7.1.1. Parameter Settings:

##### **System Parameters:**

|                   |                    |
|-------------------|--------------------|
| VDD voltage (V)   | 3.3                |
| Flash Latency(WS) | 7 WS (8 CPU cycle) |

##### **RCC Parameters:**

|                                |          |
|--------------------------------|----------|
| HSI Calibration Value          | 16       |
| TIM Prescaler Selection        | Disabled |
| HSE Startup Timeout Value (ms) | 100      |
| LSE Startup Timeout Value (ms) | 5000     |

##### **Power Parameters:**

|                               |                                 |
|-------------------------------|---------------------------------|
| Power Over Drive              | Enabled                         |
| Power Regulator Voltage Scale | Power Regulator Voltage Scale 1 |

### 7.2. SYS

**Debug: Serial Wire**

**Timebase Source: SysTick**

### 7.3. USB\_OTG\_FS

**Mode: Device\_Only**

**Activate\_VBUS: VBUS sensing**

**mode: Activate\_SOF**

#### 7.3.1. Parameter Settings:

|                                     |                     |
|-------------------------------------|---------------------|
| Speed                               | Full Speed 12MBit/s |
| Low power                           | Disabled            |
| Battery charging                    | Enabled             |
| Link Power Management               | Disabled            |
| VBUS sensing                        | Enabled             |
| Use dedicated end point 1 interrupt | Disabled            |
| Signal start of frame               | Enabled             |

## 7.4. USB\_DEVICE

### Class For FS IP: Communication Device Class (Virtual Port Com)

#### 7.4.1. Parameter Settings:

##### Basic Parameters:

|  |                                    |
|--|------------------------------------|
| USBD_MAX_NUM_INTERFACES (Maximum number of supported interfaces)       | 1                                  |
| USBD_MAX_NUM_CONFIGURATION (Maximum number of supported configuration) | 1                                  |
| USBD_MAX_STR_DESC_SIZ (Maximum size for the string descriptors)        | 512                                |
| USBD_SELF_POWERED (Enabled self power)                                 | Enabled                            |
| USBD_DEBUG_LEVEL (USB Debug Level)                                     | 0: No debug message                |
| USBD_LPM_ENABLED (Link Power Management)                               | 1: Link Power Management supported |

##### Class Parameters:

|                        |      |
|------------------------|------|
| USB CDC Rx Buffer Size | 2048 |
| USB CDC Tx Buffer Size | 2048 |

#### 7.4.2. Device Descriptor:

##### Device Descriptor:

|   |                        |
|---|------------------------|
| VID (Vendor Identifier)                       | 1155                   |
| LANGID_STRING (Language Identifier)           | English(United States) |
| MANUFACTURER_STRING (Manufacturer Identifier) | STMicroelectronics     |

##### Device Descriptor FS:

|   |                       |
|---|-----------------------|
| PID (Product Identifier)                        | 22336                 |
| PRODUCT_STRING (Product Identifier)             | STM32 Virtual ComPort |
| CONFIGURATION_STRING (Configuration Identifier) | CDC Config            |
| INTERFACE_STRING (Interface Identifier)         | CDC Interface         |

\* User modified value

## 8. System Configuration

### 8.1. GPIO configuration

| IP                    | Pin            | Signal          | GPIO mode  | GPIO pull/up pull down      | Max Speed   | User Label                           |
|-----------------------|----------------|-----------------|--|-----------------------------|-------------|--------------------------------------|
| RCC                   | PC14-OSC32_IN  | RCC_OSC32_IN    | n/a  | n/a                         | n/a         |                                      |
|                       | PC15-OSC32_OUT | RCC_OSC32_OUT   | n/a  | n/a                         | n/a         |                                      |
|                       | PH0-OSC_IN     | RCC_OSC_IN      | n/a  | n/a                         | n/a         | MCO                                  |
|                       | PH1-OSC_OUT    | RCC_OSC_OUT     | n/a  | n/a                         | n/a         |                                      |
| SYS                   | PA13           | SYS_JTMS-SWDIO  | n/a  | n/a                         | n/a         | TMS                                  |
|                       | PA14           | SYS_JTCK-SWCLK  | n/a  | n/a                         | n/a         | TCK                                  |
| USB_OTG_FS            | PA8            | USB_OTG_FS_SOF  | Alternate Function Push Pull                               | No pull-up and no pull-down | Very High * | USB_SOF [TP1]                        |
|                       | PA9            | USB_OTG_FS_VBUS | Input mode   | No pull-up and no pull-down | n/a         | USB_VBUS                             |
|                       | PA11           | USB_OTG_FS_DM   | Alternate Function Push Pull                               | No pull-up and no pull-down | Very High * | USB_DM                               |
|                       | PA12           | USB_OTG_FS_DP   | Alternate Function Push Pull                               | No pull-up and no pull-down | Very High * | USB_DP                               |
| Single Mapped Signals | PD8            | USART3_TX       | Alternate Function Push Pull                               | No pull-up and no pull-down | Very High * | STLK_RX [STM32F103CBT6_PA3]          |
|                       | PD9            | USART3_RX       | Alternate Function Push Pull                               | No pull-up and no pull-down | Very High * | STLK_TX [STM32F103CBT6_PA2]          |
|                       | PA10           | USB_OTG_FS_ID   | Alternate Function Push Pull                               | No pull-up and no pull-down | Very High * | USB_ID                               |
|                       | PB3            | SYS_JTDO-SWO    | n/a  | n/a                         | n/a         | SWO                                  |
| GPIO                  | PC13           | GPIO_EXTI13     | External Interrupt Mode with Rising edge trigger detection | No pull-up and no pull-down | n/a         | USER_Btn [B1]                        |
|                       | PB0            | GPIO_Output     | Output Push Pull   | No pull-up and no pull-down | Low         | LD1 [Green]                          |
|                       | PB14           | GPIO_Output     | Output Push Pull   | No pull-up and no pull-down | Low         | LD3 [Red]                            |
|                       | PG6            | GPIO_Output     | Output Push Pull   | No pull-up and no pull-down | Low         | USB_PowerSwitchOn [STMPS2151STR_EN]  |
|                       | PG7            | GPIO_Input      | Input mode   | No pull-up and no pull-down | n/a         | USB_OverCurrent [STMPS2151STR_FAULT] |
|                       |                |                 |  |                             |             |                                      |

| IP | Pin | Signal      | GPIO mode        | GPIO pull/up pull down      | Max Speed | User Label |
|----|-----|-------------|------------------|-----------------------------|-----------|------------|
|    | PB7 | GPIO_Output | Output Push Pull | No pull-up and no pull-down | Low       | LD2 [Blue] |

## 8.2. DMA configuration

nothing configured in DMA service

### 8.3. NVIC configuration

#### 8.3.1. NVIC

| Interrupt Table                         | Enable | Preenmption Priority | SubPriority |
|---|--------|----------------------|-------------|
| Non maskable interrupt                  | true   | 0                    | 0           |
| Hard fault interrupt                    | true   | 0                    | 0           |
| Memory management fault                 | true   | 0                    | 0           |
| Pre-fetch fault, memory access fault    | true   | 0                    | 0           |
| Undefined instruction or illegal state  | true   | 0                    | 0           |
| System service call via SWI instruction | true   | 0                    | 0           |
| Debug monitor                           | true   | 0                    | 0           |
| Pendable request for system service     | true   | 0                    | 0           |
| System tick timer                       | true   | 0                    | 0           |
| USB On The Go FS global interrupt       | true   | 0                    | 0           |
| PVD interrupt through EXTI line 16      | unused |                      |             |
| Flash global interrupt                  | unused |                      |             |
| RCC global interrupt                    | unused |                      |             |
| EXTI line[15:10] interrupts             | unused |                      |             |
| FPU global interrupt                    | unused |                      |             |

#### 8.3.2. NVIC Code generation

| Enabled interrupt Table                 | Select for init sequence ordering | Generate IRQ handler | Call HAL handler |
|---|-----------------------------------|----------------------|------------------|
| Non maskable interrupt                  | false                             | true                 | false            |
| Hard fault interrupt                    | false                             | true                 | false            |
| Memory management fault                 | false                             | true                 | false            |
| Pre-fetch fault, memory access fault    | false                             | true                 | false            |
| Undefined instruction or illegal state  | false                             | true                 | false            |
| System service call via SWI instruction | false                             | true                 | false            |
| Debug monitor                           | false                             | true                 | false            |
| Pendable request for system service     | false                             | true                 | false            |
| System tick timer                       | false                             | true                 | true             |
| USB On The Go FS global interrupt       | false                             | true                 | true             |
